# 1991

AMERICAN ARCHERY

# High Country Archery

Within these pages you will discover 29 of the finest bows, arrows, and accessories ever assembled under one cover. From the innovative Ultra Extreme, a speed-bow hunter unlike any other, to the notoriously hard-hitting Safari; from the i-dotting Olympic Champion to futurized American Archery classics, this is the sport's most anxiously awaited exhibit of archery tackle.

Ten years ago the average bowhunter probably shot less than 500 arrows per year. Four hundred and fifty of his shafts, give or take, went hastily in the direction of a flat target face pinned to a loosely packed hay bale. If he was lucky and patient, a handful of his arrows took flight at small game and maybe a whitetail or two.

Casual recreationalists remain as the sport's majority. But far and away the most exciting and dynamic new bowhunting segment is the game-shot specialist. He hunts and scouts more than most, and he surely spends more time readying for the seriousness and difficulty of shots at game. He enjoys the association, the solid practice, and the sensation that comes by walking an unmarked course and letting good arrows go at free standing animal targets. If he's a game-shot specialist by this definition, hunter and 3-D shooter, there's a distinct chance that High Country is his brand of bow.

About the time 3-D tournaments exploded in popularity, High Country Archery began production of its winning design. The bow uniquely relaxed to 65% of the peak draw weight, yet its shortness from axle to axle and low brace height meant a more powerful stroke. Specialists reacted to the new found comfort of more let-off and break-neck arrow speeds by recording unthinkable high scores on 3-D ranges nationwide. Based on the spreads that developed between winning and shooting well enough to have fun, which is basic to a round of 3-Ds, if you didn't have High Country capability you hoped your competition didn't either. Over

High Country 3-D target bows and styles from our hunting series have helped the nation's top archers preside over the International Bowhunting Organization's (IBO) manufacturer's division for an unprecedented four-year term. Randy Ulmer of Arizona contributed a gold medal to the cover collection by winning the 1990 World Field Championship with a High Country.

the past four years some aspects of bowhunting haven't changed.

More major 3-D events have been won with High Country compounds since 1987 than all other bow makes combined. The clarity of that statement turns our competitors ashen, because they can't truthfully make a tougher claim. At the same time, they know that archery's growing number of specialists consider High Country's four-time,

back-to-back domination of the National 3-D Championships are the truest measure of game-shot accuracy.

Such candor demands another point here about High Country Archery and its newest acquisition, American Archery. Bows from both of these lines are sold exclusively through qualified, "neighborhood" pro shops. The accessibility of hands-on expertise, along with a local supply of quality archery tackle, is vital to any technical sport. Unlike most manufacturers, High Country recognizes the fact that selling archery gear stopped being a hobby for local business people 50 years ago. That this company considers pro shops the sport's fundamental resource is another radical concept, a philosophy that will clear out a room filled with representatives from most other major archery companies.

In a special way High Country has played a large role in modernizing today's efficient compound bow: a tradition that continues in 1991. As you experience this publication, here are a few of the highlights archery specialists will be discussing in the months ahead:

**Ultra Extreme** — By pounds it's the world's lightest bow.

**High Country Championship Series** — Somewhere among the half-dozen assuredly stands a couple of 1991 gold medal winners, the World's next 3-D champion.

**High Country Hunter Series** — Bowhunting's best bows have improved for 1991.

**American Archery** — The tradition and innovation.

**Easton Arrows** — Tree Leaf shafts to match High Country bows, XX75 SuperLites, A/C/Cs.

**H.C.A. Flight Master Arrow Rests** — Take a look at the year's hottest launcher, the biggest dealer exclusive since we sold our first bow.

**High Country's all-new Lifetime Axle-To-Axle Warranty**

## Ultra Extreme

High Country's Ultra Extreme is a compound bow that's likely lighter than your present favorite by pounds.

## The Arrow Velocity Of Light Speed Requires Ultra Extreme Carbon Technology

**At just over two pounds the High Country Ultra Extreme seems to defy gravity. Imagine it: A compound bow that's likely lighter than your present favorite by pounds.**

Archers have been discussing the strengths of their bows and arrows for roughly 600 centuries. Very recently they've settled almost single-mindedly on arrow speed as a primary topic. High Country addressed that issue completely in 1987 by tightening the compound's design to the point that a new term was coined — speed bow.

With our existing bows in full control of what is currently the sport's most demanding and popular competition, the unmarked-distance 3-D tournament, High Country had the luxury of seeking another world to conquer. One interesting topic was mass weight. Actually, it was the regular observations from others, statements of fact that we too found ourselves making before long, tough hunts or tournaments came to a close. Quite simply, on one hill or another, we've all wished that our compound bows weren't so blasted heavy. "If I'd just had my bow in my hand . . . If I hadn't dropped my bow arm . . . It weighs more than a rifle, but at least it's cumbersome, too . . ."

High Country calls the solution to nearly two decades of heavy compounds, Light Speed. It's a new riser designed with computer technology and carbon, the space-age wonder that's 10 times lighter than steel and five times stronger.

To the eye, Light Speed's shape looks little different than the Safari's award-winning handle. But to the touch, stacking Light Speed up against other risers is akin to comparing apples to watermelons.

Ultra lightweight, stiffness for stability, carbon's aptitude for soaking up vibration, all combine to place Ultra Extreme's Light Speed riser in the front row of archery technology.

In its standard-setting form, the Ultra Extreme also features High Country's Fast-Flight rigged, 65% let-off Phantom cam and Power Glass straight limbs. You better believe it's fast and accurate going in because Ultra Extreme's lightness of being is dizzying enough to take possession of.

For those who can't get enough of a good thing, High Country also offers Ultra Extreme with carbon bias/carbon uni 16-inch laminated recurve limbs and the Phantom Extreme cam. There's never been a lighter weight barn burner quite like the Ultra Extreme with Speed Light riser. You don't see this bow, you behold it.

**Riser:** Carbon Light Speed  
**Limbs:** Power Glass 16-inch straight limbs. Carbon bias/carbon uni laminated 16-inch recurves are available.  
**Wheels:** Phantom cams featuring 65% let-off  
**Grip:** Custom two-piece wood  
**Axle-to-axle length:** 41 inches  
**Harness system:** Complete Fast Flight or no-teardrop cable  
**Draw lengths:** 26 to 32 inches in two-inch increments  
**Draw weights:** 35 to 85 pounds over a 15-pound range  
**Colors:** Tree Leaf or Real Bark. Optional Carbon Hunter Gray and four Carbon Rainbow colors are available.

The Ultra Extreme can be ordered with options like Phantom Extreme cams (shown here) and/or carbon bias/carbon uni laminated 16-inch recurve limbs. Phantom Extremes reflect High Country's four year commitment to speed. They're efficient and smooth with big-league speed.

# Champion Series

## Olympic Champion

Archery's greatest events are won by top competitors using the world's best tackle. Margins of error are measured in fractions, and winners repeat perfection shot after shot. The Olympic Champion, our top-of-the-line entry for those who need the stability of precise groups in repetition, features the forgiving power and genuine balance of a true olympian.

Riser: SL2 center shot aluminum  
Limbs: Power Flex 19-inch laminated wood core, graphite bias recurves  
Wheels: Machined aluminum tri-draws featuring 60% let-off  
Grip: Custom one-piece wood  
Axle-to-axle length: 46 inches  
Harness system: Teardrop cable  
Draw lengths: 26 to 33 inches in two-inch increments  
Draw weights: 35 to 70 pounds over a 15-pound range  
Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## Grand Champion

Speed conscious tournament shooters will appreciate the Grand Champion's balance of speed and accuracy.

Riser: SL2 center shot aluminum  
Limbs: Power Flex 17-inch laminated Power Glass recurves  
Wheels: Machined aluminum Hybrids featuring a full 65% let-off  
Grip: Custom two-piece wood  
Axle-to-axle length: 43 inches  
Harness system: Continuous Fast Flight or no-teardrop cables  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## 3-D Royal Champion

You're looking at the bow that's sure to dominate 3-D tournaments all over the world in 1991. It's the 3-D shooting machine that our competition will dread most this year, and it places all of your rivals in an "undergunned" position.

Riser: SL2 center shot aluminum  
Limbs: Power Flex 16-inch laminated Power Glass recurves with 65% let-off  
Wheels: New Phantom Extreme machined aluminum bi-draw  
Grip: Custom two-piece wood  
Axle-to-axle length: 40 inches  
Harness system: Fast Flight  
Draw lengths: 28 to 32 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

Olympic Champion

Grand Champion

3-D Royal Champion

Arizonan Randy Ulmer won the International Archery Federation's World Field Championship in Norway during 1990. It was the first time ever for a compound bow division.

## World Champion

### Phantom 3-D

Options: Carbon limb / carbon cam laminated recurve limbs

## National Champion

## World Champion

Last year we called this model the Target Safari, but after winning the World 3-D Championship in 1990 it earned a more befitting name. Speed and pinpoint accuracy are still its trademarks, characteristics that will keep the World Champion in demand throughout the tournament season.

Riser: SL1 center shot aluminum  
Limbs: Power Glass 16-inch straight limbs

Wheels: Phantom machined aluminum bi-draws with a 65% let-off

Grip: Custom two-piece wood

Axle-to-length: 41 inches

Harness system: Continuous Fast Flight or no-teardrop cable

Draw lengths: 26 to 32 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## Phantom 3-D Champion

We're confident that the all-new Phantom 3-D Champion will chisle out special places in hunting-format tournaments worldwide.

Riser: AV2 center shot aluminum

Limbs: Power Flex 16-inch laminated glass recures

Wheels: Phantom machined aluminum bi-draws featuring 65% let-off

Grip: Self contained

Axle-to-axle length: 39 inches

Harness system: Complete Fast Flight or no-teardrop cable

Draw lengths: 26 to 32 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## National Champion

More National World 3-D Championship records have been set and broken with this compound than with any other bow in history.

Riser: SN2 center shot aluminum

Limbs: Power Glass 16-inch straight limbs

Wheels: Hybrid machined aluminum bi-draws featuring 65% let-off

Grip: Custom two-piece wood

Axle-to-axle length: 41 inches

Harness system: Complete Fast Flight or no-teardrop cable

Draw lengths: 26 to 32 inch in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: HC/AA red, blue, black, gold and pink. Optional custom colors are available.

# Hunter Series

## Majestic Hunter

Here's the bow that you can count on to deliver perfect shots.

Riser: 512 center shot aluminum  
Limbs: Power Flex 19-inch laminated glass graphite bias recurves  
Wheels: Hybrid machined aluminum bi-draw with 65% let-off  
Grip: Custom two-piece wood  
Axle-to-axle length: 46 inches  
Harness system: Complete Fast Flight or no-teardrop cable  
Draw lengths: 28 to 34 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Tree Leaf or Real Bark

## Legendary Hunter

Like its target counterpart, the Legendary Hunter is a superlative all-around selection.

Riser: SL2 center shot aluminum  
Limbs: Power Flex 17-1/2-inch laminated Power Glass recurves  
Wheels: Hybrid machined aluminum bi-draws featuring 65% let-off  
Grip: Custom two-piece wood  
Axle-to-axle length: 43 inches  
Harness system: Complete Fast Flight or no-teardrop cable  
Draw lengths: 28 to 31 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Tree Leaf or Real Bark

## Royal Hunter

The future of precise bowhunting accuracy is available today... just ask for the Royal Hunter.

Riser: SL2 center shot aluminum  
Limbs: Power Flex 16-inch laminated glass graphite bias recurves  
Wheels: New Phantom Extreme bi-draws with 65% let-off  
Grip: Custom two-piece wood  
Axle-to-axle length: 40 inches  
Harness system: Complete Fast Flight  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Tree Leaf or Real Bark

## Phantom Hunter

Compact and quiet with speed to burn, Phantom brings the sweetness of laminated recurve limbs to an exclusive level of high performance.

Riser: AV2 center shot aluminum  
Limbs: Power Flex 16-inch laminated glass recurves  
Wheels: Phantom machined aluminum bi-draws featuring 65% let-off  
Grip: Self contained  
Axle-to-axle length: 39 inches  
Harness system: Complete Fast Flight or no-teardrop cable  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Tree Leaf or Real Bark

When Randy Ulmer isn't at a 3-D tournament or the World Field Championship he's at work or on a bowhunt. Here's his 1990 "sniper" bull.

Wayne Carlton's ability to call all kinds of game animals is in a class all by its lonesome. His most tremendous trophy taken with High Country tackle is this world record Canadian moose.

## High-Grade Laminated Limbs

American Archery limbs have always been an industry standard. In 1991 you will hear more talk than ever before about the worth of finely crafted laminated recurve limbs. A world of difference, that's how the smooth, accurate power of a laminated recurve limb compares to the inconsistencies inherent to inexpensive, recurve limbs of molded plastic.

American's Power Flex limbs feature an exclusive process that combines a synthetic core with carbon uni, carbon laminates, or X-12 bias laminates and a maple or Power Glass wedge. Bias laminations are comprised of fibers woven at a 45-degree angle to the limb's centerline. Our new 16-inch carbon uni limbs provide optimum durability and a maximum dose of consistency for smooth, rapid limb recovery. Torsional stability and rigidity are assured from one matched set to another.

There's a new 17-1/2-inch x X-12 bias laminated glass recurve limb in the line, too. That should be bow lines, plural. Risers from both High Country and American Archery bows benefit in 1991.

American Archery's new AR2 Mag riser has shorter limb pockets and a beautiful, flowing look all its own for 1991. Magnesium gives the AR2 strength and light weight. The AR2, finished with a comfortable and slim custom one-piece wood grip, is standard equipment on all top-of-the-line Americans. Once you shoot a completely redesigned American bow, we know you'll agree that The New Force is at work at this distinguished archery company.

# American Bows

## Ultimate

Aptly named, the Ultimate gives dedicated tournament archers the capability to place arrows with rifle-like precision. For the discriminating professional, this is an immaculate instrument. Ultimate highlights include the new AR2 magnesium riser and EXP Hybrid wheels.

Riser: AR2 center shot magnesium  
Limbs: Power Flex 19-inch recurve wood laminate with graphite bias  
Wheels: EXP machined aluminum step wheels with 65% let-off  
Grip: Custom one-piece wood  
Axle-to-axle length: 46 inches  
Harness system: Fast Flight bow string with steel cables  
Draw lengths: 24 to 33 inches in two-inch increments  
Draw weights: 35 to 70 pounds over a 15-pound range  
Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## Vision

One of three American bows that makes its premier on these pages, Vision's lower brace height will be welcomed by American lovers who have longed for a short, sweet, flat-shooting bow. The High Country 3-D label now has a new, truly dangerous rival at unmarked distance tournaments.

Riser: AR2 center shot magnesium  
Limbs: 17-1/2-inch Power Flex recurves with X12 bias  
Wheels: EXT Hybrids with 65% let-off  
Grip: Custom two-piece wood  
Axle-to-axle length: 43 inches  
Harness system: Complete Fast Flight or no-teardrop cables  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 85 pounds over a 15-pound range  
Colors: Smoke glitters. Optional custom colors are available.

New this year on select American bows will be the Phantom cam. It's one of the market's smoothest and features a full 65% let-off at full draw.

Ultimate

Vision

Challenger 3-D

Eliminator 3-D

Optional: Carbon bias / carbon uni laminated recurve limbs

Dream

## Challenger 3-D

The brand-new, all-American 3-D "hot dog" that is bound to improve your score.

Riser: AR2 center shot magnesium  
Limbs: Power Glass 16-inch straight limbs

Wheels: EXP machined aluminum modular with 65% let-off

Grip: Custom one-piece wood  
Axle-to-axle length: 42 inches  
Harness system: Complete Fast Flight  
Draw lengths: 26 to 34 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Smoke glitters with optional colors available.

## Eliminator 3-D

To flatten your arrow's trajectory by as much as 40%, the Eliminator 3-D is a great place to start.

Riser: AR2 center shot magnesium  
Limbs: Power Flex laminate glass recurve

Wheels: Phantom Extreme cam with 65% let-off

Grip: Custom one-piece wood  
Axle-to-axle length: 39-1/2 inches  
Harness system: Complete Fast Flight  
Draw lengths: 26 to 32 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Smoke glitter red, blue, gold, green and silver. Optional custom colors are available.

## Dream

If you remember the American Dream to be exceptionally gifted at smoothly shot pinwheels, you remember it well. We've stoked the speed by shortening the limb length.

Riser: AR2 center shot magnesium  
Limbs: Power Glass 17-inch straight limbs

Wheels: EXT Hybrid modular with 65% let-off

Grip: Molded  
Axle-to-axle length: 42 inches  
Harness system: Complete Fast Flight  
Draw lengths: 26 to 34 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Candy apple red, blue, black, gold and pink

# American Bows

## Champion Hunter

You'll come to appreciate why many of the world's best bowhunters prefer American bows.

Riser: AR2

Limbs: Power Flex 19-inch laminated recurve limbs

Wheels: EXT Hybrids with 65% let-off

Grip: Molded

Axle-to-axle length: 46 inches

Harness system: Fast Flight or no-teardrop steel cables

Draw lengths: 26 to 33 inches (All American bows are available to 34 inches. Specify XL)

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Tree Leaf or Real Bark

## Silencer

It's got the works for great bowhunting including American's new handle.

Riser: AR2

Limbs: 17-1/2-inch Power Flex recurves

Wheels: EXT Hybrid with 65% let-off

Grip: Molded

Axle-to-axle length: 43 inches

Harness system: Complete Fast Flight

Draw lengths: 26 to 32 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Tree Leaf or Real Bark

Lamorne Roatch used a Trophy Hunter on one of Wisconsin's best bucks ever. The deer had 14 points and scored 165-2/8 inches.

Champion Hunter

Silencer

## Eliminator

Optional: Carbon bow / carbon riser / laminated hollow limbs

## Challenger

## Challenger

Wouldn't you like a bow for whitetails that could hold its own at the 3-D range? You'll love a Challenger. It's all-new, too.

Riser: AR2

Limbs: Power Glass 16-inch straight limbs

Wheels: EXP with 65% let-off

Grip: Molded

Axle-to-axle length: 42 inches

Harness system: Complete Fast Flight

Draw lengths: 26 to 34 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Tree Leaf or Real Bark

## Eliminator

There's never been an American hunting bow like this one.

Riser: AR2 magnesium

Limbs: Power Flex 16-inch recurves

Wheels: Machined aluminum

Phantom Extremes with 65% let-off

Grip: Molded

Axle-to-axle length: 39-1/2 inches

Harness system: Complete Fast Flight

Draw lengths: 26 to 32 inches in two-inch increments

Draw weights: 35 to 85 pounds over a 15-pound range

Colors: Tree Leaf or Real Bark

Tree-Leaf, the perfect camouflage for bowhunting among autumn's colors, will be available on American and High Country bows by mid-1990.

## Wood Handled Americans

Nothing can match the traditionally warm feel of a laminated maple riser on a crisp morning in the deer woods. Furthermore, nothing matches American's wood handle for functional, comfortable beauty.

### Winter Hawk

Riser: Center Supreme wood laminate  
Limbs: Power Flex 19-inch laminated recurves  
Wheels: EXP modular with 65% let-off  
Grip: Self contained  
Axle-to-axle length: 44 inches  
Harness system: Continuous Fast Flight  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 70 pounds over a 15-pound range

### Predator

Riser: Center Supreme laminate  
Limbs: Power Flex 17-1/2-inch laminates  
Wheels: EXP modulars with 65% let-off  
Grip: Self contained  
Axle-to-axle length: 41 inches  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 70 pounds over a 15-pound range

### Panther

Riser: Center Supreme laminate  
Limbs: 17-inch Power Glass straight limbs  
Wheels: Hybrids with 65% let-off  
Grip: Self contained  
Axle-to-axle length: 40 inches  
Draw lengths: 26 to 32 inches in two-inch increments  
Draw weights: 35 to 70 pounds over a 15-pound range

Phil Phillips is one of the top bowhunting outfitters on the planet. He specializes in antelope, and Colorado's number two buck in 1989 fell to his Challenger.

Winter Hawk

Predator

Panther

## Bobcat

## Bobcat

The Bobcat has been specially redesigned with a smaller grip. Shorter draw lengths than ever before, the Bobcat offers youthful shooters big-bow quality.

Riser: Laminated wood

Limbs: Power Glass 14-inch straight limbs

Wheels: Impulse or Hybrids with 65% let-off

Grip: Self contained

Axle-to-axle length: 35-1/2 inches

Harness system: Cable or Fast Flight

Draw lengths: 21 to 24 inches in one-inch increments

Draw weights: 25 to 50 pounds over a 10-pound range

Color: Black

Colorado resident Phil Phillips took his American Challenger to Alaska and dumped an awfully fine caribou that scored 330 Pope and Young points.

A prairie habitat and wonderful eyesight make the pronghorn, America's most unique game animal, difficult to take with a bow. Art Hall, an American Archery dealer from Columbia, Connecticut, used a graphite arrow on this buck.

# Promotional Gear

- 1) H.C.A. Camo Caps  
 (#16-010 - Woodland Camo)  
 (#160911 - Trebark)  
 Baseball style with adjustable band. One size fits all.
- 2) H.C.A. Shooters Caps  
 (#16-020 - White)  
 (#16-021 - Black)  
 (#16-022 - Khaki)  
 These caps are built to last. Pick your favorite color and wear this attractive, embroidered, golf style cap with pride.
- 3) H.C.A. Fluorescent Shooters Caps  
 (#16-030 - Yellow)  
 (#16-031 - Green)  
 (#16-032 - Orange)  
 (#16-033 - Pink)  
 Light up the target range with these bright and attractive colors. Embroidered logo. One size fits all.
- 4) H.C.A. Corduroy Cap (#16-040 - Blue)  
 This high quality cap is embroidered with the High Country logo.

- 5) H.C.A. Khaki Shirts  
 (#16-050 - Short Sleeve)  
 (#16-051 - Long Sleeve)  
 Rugged and full cut for the active sportsman. These shirts have a custom High Country embroidered logo.

Weight 115 grains, three blade, 1-1/4" diameter with stainless steel, .020 inch thick blades. Replacement blades (#14-045)
- 10) Wasp Hi-Tech XLS (#14-041)  
Weight 100 grains, three blade, 1-1/8" diameter with stainless steel, .020 inch thick blades. Replacement blades (#14-046)
- 11) Wasp Hi-Tech SL-75 (#14-042)  
Weight 75 grains, three blade, 1-1/8" diameter with stainless steel, .020 inch thick blades. Replacement blades (#14-047)
- 12) Wasp Cam-Lok (#14-043)  
Weight 140 grains, four blade, 1-1/6" diameter with stainless steel, .015 inch thick blades. Replacement blades (#14-048)
- 13) Wasp Cam-Lok (#14-044)  
Weight 130 grains, three blade, 1-1/6" diameter with stainless steel, .015 inch thick blades. Replacement blades (#14-049)

## Sweetland Accessories

For precision-fitted threaded and taper hole field, bullet and target points in all popular sizes, Sweetland has a reputation for quality. There's a strong selection of steel blunts, short or long aluminum broadhead and nock adapters, shaft inserts, and stabilizer bushings to choose from, too.

Sweetland products are available in bulk orders or in attractive bubble packages that will add to any accessory display. Please consult High Country's 1991 price sheet for a list of available sizes.

# Bow Sights

- 1) Eliminator  
(#06-010 - Black)  
(#06-011 - Tree Leaf)  
The latest in tree-stand sight designs. Features both a pivoting lighted pin and a colored pin multi-yard sight. Eliminator can be used on level ground or from a tree, and it also serves as a range finder.
- 2) Fine Line Hunter Sight  
(#06-020)  
The rugged Hunter uses the cross hair principle for supreme accuracy. Its shadow box pin guard is double slotted to allow close settings of the cross hairs. Adjustments for center shot and vertical group control are quick and sure.
- 3) Check-It MH-62  
(#06-030)  
A sturdy, compact adjustable sight that allows close pin alignment. A sight-pin guard makes it great for the toughest bowhunt.
- 4) Check-It MH-26  
(#06-031)  
A heavy-duty double slide sight featuring five 8/32-inch heavy-duty brass pins.
- 5) High Country Advanced 1000 Sight  
(#06-040)  
Comes with four, color-coded 6/32-inch sight pins. Three slots enable close pin setting.
- 6) High Country Huntmaster Sight  
(#06-041)  
(#06-042 - With Sight Guard)  
Heavy-duty hunting sight comes with four double locking, heavy-duty brass pins.
- 7) High Country Pro 1100 Sight  
(#06-043)

- 8) Zero Peep  
(#06-050)  
A small rubber tube brings the peep into exact alignment at full draw every time.
- 9) Tru Peep  
(#06-060 - Micro)  
(#06-061 - Small)  
(#06-062 - Large)

(#06-044 - With Sight Guard)  
Double locking independent elevation and windage adjustment pins. Triple adjustment slots offer more accessible and precise pin adjustments.

(#06-063 - Hunter)  
An aluminum peep with a special design that allows the peep to remain parallel to the bow at full draw.

- 10) Shurz Peep  
(#06-070 - Small)  
(#06-071 - Large)  
This specially designed peep gives a clean aiming circle no matter how the string is rolled.
- 11) Aim Peep Aligner  
(#06-080)  
The aim system allows you to select

your own peep setting quickly. The sight aligner automatically self aligns every time. Mounts on cables without an adhesive anchor pad.

12) H.C.A. Pin Guards  
 (#06-090)  
 (#06-091 - Deluxe)

13) H.C.A. Fire/Fly Pin  
 (#06-100)  
 Heavy-duty, double locking, luminous sight pins.

14) H.C.A. Sight Pin  
 (#06-110)  
 This pin features double locking independent elevation and windage adjustments.

15) SightMaster  
 (#06-120)  
 Precision made sight features constant vertical movements. Move pin to the yardage you choose. Hold the SightMaster's quick-adjust cross hair dead on for sharp accuracy no matter what the distance.

- 16) TouchMaster  
 (#06-121)  
 Adjust your SightMaster sight with your bow hand even at full draw.
- 17) Check-It 5-9000  
 (#06-130 - Black)  
 (#06-131 - Silver)  
 A superb target sight with micrometer windage and elevation adjustments. It comes with an eight-inch extension slide and large knob.
- 18) Check-It Scope  
 (#06-135)  
 Black, powder-coated aluminum hood with coated, non-glare lens. It also has a center dot and bubble level.
- 19) Check-It Sight Aperture  
 (#06-140)  
 Fits most standard target sights on the market.
- 20) Check-It Hooded Pin  
 (#06-142)  
 Fits most standard target sights to limit glare.
- 21) Toxonics 3000  
 (#06-150 - Black)  
 (#06-151 - Silver)  
 Favored by top tournament shooters for its adjustability and sturdy construction. Features dual-track locking system and dual yardage markers for quick-adjust accuracy.
- 22) T-Dot Sight Pin  
 (#06-160 - 6/32)  
 (#06-161 - 8/32)  
 T-Dot sight pins are always visible, no matter how dark the day. Translucent "T" picks on stray ambient light and makes the unit glow.

# H.C.A. Flight Master Rests

## 1) H.C.A. Center Shot Rollar (#02-010)

Shoot-through arrow rests just took a giant step forward with the advent of the H.C.A. Center Shot Rollar. Teflon prong tips rotate to give your arrow a quiet, precise ride. Simple adjustments control prong tension and positioning for fast, accurate tuning. Solid construction, close tolerance fits, a hard finish, and an enclosed spring tension mechanism guarantee tight-group performance in all kinds of weather conditions. Upon seeing it first hand, the verbal reaction is "sold!"

## 2) H.C.A. Micro Adjust Center Shot Rollar (#02-011)

The same fine workmanship and materials that make the Center Shot Rollar the choice of champions, plus a patent-pending micro adjustment for quick minute-of-angle left or right tuning. Fletching clearance is no problem with any arrow type. Setting up a bow-and-arrow combination was never easier.

## 3) H.C.A. Center Shot (#02-020)

For the archer who's hooked on pointed prong tips, the Center Shot is a high-quality answer. It's got all the features that make the rollar version unique — internally housed spring, simplicity, and built to last.

## 4) H.C.A. Micro Adjust Center Shot (#02-021)

Adjusting the "center shot" of a bow used to take four hands and a pot of coffee. With the H.C.A. Flight Master Micro Adjust Center Shot, horizontal arrow rest movements have become a one-thumb operation. You'll wonder why someone didn't think of this sooner.

## 5) H.C.A. Target-Hunter (#02-030)

Used in conjunction with High Country's Flight Master Hunter or Target plunger, the single-arm Target-Hunter gives clean shots time after time. Whether you use a mechanical release aid or shooting tab, the Target-Hunter is a rest you can win with whatever the game. If you're looking for a rest with rugged, thought through design functions . . . the hunt is over.

## 6) H.C.A. Micro-Adjust Target Hunter (#02-031)

Plug in a high-quality pressure button and step up to the shooting line. One-finger micro-adjust

capability for centering in a heartbeat is the only difference you'll notice between this offering and the dependable Target-Hunter. Whatever your shooting style, this is the single arm shoot-through rest you would design.

## 7) H.C.A. Flight Master (#02-040)

Super quiet, torque-adjustable

single arm, Teflon rollar . . . features that enhance an arrow rest and expose your best shooting. The Teflon rollar is replaceable, but you'll have hundreds of arrows in the bull's before it shows signs of wear.

## 8) H.C.A. Micro-Adjust Flight Master (#02-041)

"Ultimate" is often misused and

overused in descriptions. Such is not the case when describing this single-arm shoot-through with one-touch precision.

- 9) H.C.A. Flight Master Arrow Rests  
Available in silver, gold, red, blue and black finishes.
- 10) H.C.A. Flight Master Hunter Plunger  
(#02-050 - Short)

(#02-051 - Long)  
Not all pressure buttons are created equal, and you'll notice the superiority of a Flight Master plunger as soon as you make adjustments for center shot and spring tension. It's quiet enough from the wrapper for close shots at spooky bucks in still woods.

- 11) H.C.A. Flight Master Target Plunger

(#02-052 - Short)

(#02-053 - Long)

Uncompromised quality is a virtue of this close-tolerance pressure button. Along with peerless adjustability, a stainless steel ball bearing tip assures precise groups for hundreds of practice and tournament sessions. This can't help but be the finest plunger you've ever added to a bow. And like the Hunter Plunger, the target model is available in long or short configurations for standard or overdraw bows.

- 12) H.C.A. Lighted Bow Sight

(#06-010)

This is what's new in bow sights! Get this . . . at full draw the L.E.D. aim points instantly light at the end of ultra-low profile sight blades. This is precise, automatic activation, guaranteeing a perfect anchor every time. Creep forward, no light; overdraw the arrow, no light. It doesn't take a rocket scientist to install the sight or recognize how this innovation will improve an archer's consistency. Very rugged, weather resistant, adjustable . . . this bow sight is in a class all by itself.

- 13 & 14) H.C.A. Universal Lighted Sight Pin

(#06-011 - Long)

(#06-012 - Short)

This product offers the same operating features [illumination only at a precise, adjustable anchor point] as the Multi-Pin. It is designed for existing sights using 8-32" threads or slotted mounting systems. The low-profile taper makes this lighted pin unique. Available in long or short lengths.

- 15) H.C.A. Light Check Control Switch

(#06-013)

Sold as an accessory item, the control switch adapts lighted sight pins and light sources to provide the features of the patented Light Check system. It does not include the universal sight pin body.

- 16) H.C.A. Draw-Master Remote

(#06-014)

This is the ultimate "clicker." Bring your shooting form to a higher level, or beat target panic quietly with this training and shooting aid. It's not a sight. But this lighted draw-check system will let you know instantly of creeping or overdrawing — a perfect anchor every time with any type of bow.

# Overdraws & Rests

Overdraws enable the archer to shoot shorter than normal arrows by moving the arrow rest back. This reduces weight, increasing arrow speed. High Country overdraws are made of sturdy, light-weight aluminum. They are extremely adjustable. They also feature a safety shelf to reduce the chance of the arrow falling or being pulled away from the rest. All High Country overdraws are NFAA and I.B.O. approved.

1) Universal Overdraw

A super design that allows arrows to be shortened 2.5" to 3", and comes in black, chrome and Tree Leaf. It can be ordered with or without rest. (Please specify right or left hand.)

2) Quick Draw Overdraw

This overdraw, made for safety as well as speed, has a shelf that is adjustable for right or left hand, and two to five-inch lengths. Comes in black, chrome and Tree Leaf. Can be ordered with or without an arrow rest.

3) H.C.A. Overdraws are available in chrome and Tree Leaf.

Universal Overdraw (no rest)

Will accept all the new H.C.A. arrow rests.

(#01-010 - Black)

(#01-011 - Chrome)

(#01-012 - Tree Leaf)

Universal Overdraw (no rest)

Will accept most other standard rest

(#01-020 - Black)

(#01-021 - Chrome)

Universal Overdraw w/H.C.A. Center Shot Rest

(#01-030 - Black)

(#01-031 - Chrome)

(#01-032 - Tree Leaf)

Universal Overdraw w/H.C.A. Center Shot Roller Rest

(#01-040 - Black)

(#01-041 - Chrome)

(#01-042 - Tree Leaf)

Universal Overdraw w/ TM Hunter Rest

(#01-040 - Black)

(Please specify right or left hand)

Quickdraw Overdraw (no rest)

Will accept all H.C.A. arrow rests

(#01-050 - Black)

(#01-051 - Chrome)

(#01-052 - Tree Leaf)

Quickdraw Overdraw (no rest)

Will accept most other standard rest

(#01-060 - Black)

(#01-061 - Chrome)

Quickdraw Overdraw w/H.C.A.

Center Shot Rest

(#01-070 - Black)

(#01-071 - Chrome)

(#01-072 - Tree Leaf)

Quickdraw Overdraw w/H.C.A.

Center Shot Roller Rest

(#01-080 - Black)

(#01-081 - Chrome)

(#01-092 - Tree Leaf)

Quickdraw Overdraw

w/TM Hunter Rest

(#01-100)

4) H.C.A. Center Slot Roller

(#02-010)

(#02-011 - w/Micro-Adjust)

5) H.C.A. Flight Master

(#02-040)

(#02-041 - w/Micro-Adjust)

6) H.C.A. Center Shot

(#02-020)

(#02-021 - w/Micro-Adjust)

7) H.C.A. Target Hunter

(#02-030)

(#02-031 - w/Micro-Adjust)

[See page for more details on the H.C.A. Rest]

8) Cavalier Master Plunger

(#02-100)

Stainless steel with Teflon lined barrel and Teflon tips. Comes with two size tips and three spring sizes.

9) G.K.F. Cushion Plunger

(#02-110)

All brass construction.

10) H.C.A. Master Target Plunger

(#02-052 - Short)

(#02-053 - Long)

The ultimate in plunger design — ball bearing tip and micro adjustment.

11) H.C.A. Master Hunter Plunger

(#02-050 - Short)

(#02-051 - Long)

Same super smooth action as the Target Plunger.

12) Terry Rest

(#02-120)

The magic behind the Terry Arrow Rest's smooth, silent action is its magnetically retained wire rest, which gently guides the arrow during release and automatically returns for the next shot.

13) Cavalier "Super Flyte" Rest

(#02-130) Specify RH or LH

The side pressure plate is adjustable in or out to allow for arrow shaft size and can also be sent to fit your style of shooting. Pressure plate can be removed so that the rest can be used with a plunger.

14) Centerest Flipper

(#02-140) Specify RH or LH

Offers many outstanding features, including flipper action for improved arrow flight. Super quiet.

15) Overdraw Saf-T Guide

(#02-150)

A must for overdraw shooters. This "third-finger" keeps arrow on the rest, then folds down as arrow is drawn.

Arrow Rest by Golden Key — Futura

16) Golden Key — Star Hunter (#02-500)

17) Golden Key — TM Hunter (#02-501)

18) Golden Key — Hunter Supreme Metal (#02-502)

19) Golden Key — Hunter Supreme Economy (#02-503)

20) Golden Key — Larry Wise Signature (#02-504)

21) Golden Key — Huntmaster 2000 (#02-505)

22) Golden Key — Pacesetter F.T. Special (#02-506)

23) Golden Key — Hunter Supreme (#02-507)

24) Golden Key — Pacesetter I (#02-508)

25) Barner STI-11 Rest (#02-200)

One of the finest inertia rests made. Arm falls away as bow is shot for total arrow clearance. (Specify right or left hand.)

26) Barner Overdraw w/511-II Rest (#02-210)

Barner's own overdraw combined with the 511-II rest.

Ultimate Texan Tony Duker harvested the javelina with one arrow from his High Country Majestic Hunter. Tony, one of our newest Pro Hunting Advisors, is a bowhunting outfitter based in Dallas, Texas.

# Quivers

1) Super Gripper Bow Quiver

(#07-010 - Black)  
(#07-011 - Trebark)  
(#07-012 - Real Bark)  
(#07-013 - Tree Leaf)

This is a super seven arrow quiver that attaches quickly and easily to the anchor pivots of all High Country and American bows. Features a deep foam filled hood and rubber arrow locks.

2) Super Gripper Bow Quiver

Replacement Knobs  
(#07-017)

3) H.C.A. Two Piece Bow Quiver

(#07-020 - Black)  
(#07-021 - Trebark)  
(#07-022 - Real Bark)  
(#07-023 - Tree Leaf)

Unique two piece design holds eight arrows safely. Ultra-light, completely silent, extremely durable.

4) Bow Carrier

(#07-030 - Brown)  
(#07-031 - Black)  
(#07-032 - White)  
(#07-033 - Pink)  
(#07-034 - Trebark)  
(#07-035 - Mossy Oak)

A rugged carrier that hangs on your

to keep hands free. Features a steel center and loop flap to keep bow in place.

5) Buckle On Bow Sling

(#07-040)

This sling just buckles on to your bow limb and will snap on and off. Nothing has to be done to your bow. Adjustable and easy to use.

6) Hip Hugger Tournament

Accessory Belt

(#07-050 - Gray)  
(#07-051 - Khaki)

A must for any serious target or IBO shooter that features a built-in strap for almost any quiver and a bow hook on the other side. A roomy fanny pack in the back and a holder round out this archery transporter.

7) High Country Tournament Quiver

(#07-052 - Gray)  
(#07-053 - Khaki)

A truly versatile quiver loaded with features. This amigo is 17 inches long, has a binocular pocket, large accessory pocket, score card pocket, pencil slots, and a "D" ring to hang accessories from. It comes complete with four arrow tubes and a bow square loop.

8) H.C.A. Water Bottle

(#07-055)

For those hot summer tournaments, it's a 21 ounce bottle with a belt sling.

9) H.C.A. Arrow Puller

(#07-056)

This rubber composite sheet allows one-hand arrow extraction from the tightest mat.

10) H.C.A. Hip Quiver

(#07-060 - Black)  
(#07-061 - Trebark)  
(#07-062 - Mossy Oak)

A nice belt quiver that features a large pocket, pencil slot, score card slot, arrow separator and a large belt loop.

1) 12" Arm Guard  
 (#10-010 - Black)  
 (#10-011 - Trebark)  
 (#10-012 - Mossy Oak)

2) 7-1/4" Arm Guard  
 (#10-020 - Black)  
 (#10-021 - Trebark)  
 (#10-022 - Mossy Oak)  
 These arm guards feature a patented air cell material with Cordura backing.

3) H.C.A. Tuff-Lite Arm Guard  
 (#10-030 - Gray)  
 (#10-031 - Khaki)  
 The most comfortable arm guards available today!

4) Deluxe Leather Glove  
 (#10-040 - Small)  
 (#10-041 - Medium)

(#10-042 - Large)  
 (#10-043 - Extra Large)  
 A high quality shooting glove made of soft pliable leather.

5) Calf Hair Tab  
 (#10-050 - Small)  
 (#10-051 - Medium)  
 (#10-052 - Large)  
 (#10-053 - Extra Large)  
 Clipped calf hair face, removable rubber layer, leather liner and soft rubber finger spacer. RH or LH.

6) Fab Tab  
 (#10-060 - Small)  
 (#10-061 - Medium)  
 (#10-062 - Large)  
 Built-in lubricant makes this tab special. Water resistant — shoots the same in all kinds of weather.

7) Quickshot Release  
 (#09-010)  
 The Quickshot features a caliper mechanism, adjustable trigger and comfortable leather wrist strap.

8) Release Wrist Strap  
 (#09-020 - Black)  
 (#09-021 - Trebark)  
 (#09-022 - Black With Buckle)  
 This comfortable padded release strap fits most popular releases.

9) Barner 250  
 (#09-030 - Concho)  
 (#09-031 - Wrist Strap)  
 One of the finest rope releases available. Its few moving parts are made of case hardened steel.

10) Barner "Elk Hunter"  
 (#09-040 - Concho)  
 (#09-041 - Wrist Strap)  
 Case hardened steel working parts make this one of the finest hunting or target releases available.

11) Fletchhunter Concho  
 (#09-050)

12) Fletchhunter Wrist  
 (#09-051)

13) Fletchmatic Concho  
 (#09-052)

14) Fletchmatic Wrist  
 (#09-053)

All Fletcher releases are adjustable over a center linkage system.

15) Trophy Hunter  
 (#09-060)  
 A popular release aid that features a patented system of opposing polished ball bearings for a crisp, fast release every time.
